

Stuart Bingham

Chandler, AZ | (480)498-8273 | bingham.stuart@gmail.com | stuartbingham.net

IT professional with 10+ years in systems administration, infrastructure support, and platform modernization — leading server migrations, automation initiatives, and technical support across multi-client environments and 100,000+ managed devices.

Charity Golf Today Software Developer

Oct 2024 – Present
Chandler, AZ

- Support IT infrastructure and web platforms for **14 client companies**, partnering directly with clients to troubleshoot issues and maintain system stability.
- Led server migrations and platform modernization (PHP upgrades, hardware improvements) that cut average page load times by **up to 50%** and reduced some long-running queries from 24–30 seconds to sub-second — **up to a 30x performance improvement**.
- Consolidated **13 legacy sites** into standardized, version-controlled workflows, streamlining maintenance and deployment across the client portfolio.
- Built and maintain custom APIs and automation tools, including an **AI-based lead generation system**, to support internal data access and business operations.
- Continuously monitor and improve application stability, performance, and functionality across client environments.

Proveo Automation Lead Developer – Automation & API Development

Dec 2019 – Sep 2024
Remote

- **Led automation, infrastructure, and systems-integration initiatives** — building websites, applications, and API-driven tooling while managing workflows and technical requirements for multiple clients.
- **Designed and deployed 22 automation and analysis tools** using UiPath, streamlining operations and significantly improving client efficiency.
- **Directed codebase and release management** through structured review processes, ensuring reliable, well-tested deployments across client systems.

TeamLogicIT Automation Developer & Web Application Support

May 2017 – Oct 2019
Phoenix, AZ

- Automated deployments and managed tools for over 30,000 devices using **VBScript** and **KML** scripting.
- Managed web applications for clients in healthcare and power generation sectors, achieving 99% uptime.
- Provided advanced technical support for web applications and automation tools, resolving complex issues and enhancing system reliability.

Allcovered, Konica Minolta Business Solutions Service Design and Transition Engineer

Nov 2014 – Mar 2017
Phoenix, AZ

- Developed automation scripts using **Kaseya** and **Group Policy**, improving security across over 124,000 devices and reducing manual work by one hour per device.
- Acted as Subject Matter Expert (SME) on **Airwatch**, **Bitdefender**, **Kaseya**, and **Endpoint Security** tools, delivering training to over 800 engineers.
